PROFESSIONAL SUMMARY

Computer Science undergraduate (2027) with a strong foundation in frontend development using React.js, TypeScript, and JavaScript. Passionate about building responsive, user-friendly web applications and eager to expand into software quality engineering and test automation. Quick learner with experience collaborating on real-world projects using Git, Docker, and modern development practices.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, TypeScript, Responsive Design, Progressive Web Apps (PWA)

Programming Languages: Python, Java, C

UI/UX Design: Figma, Wireframing, Prototyping, User Research, Usability Testing, Interaction Design, Information Architecture

Tools & DevOps: Git, GitHub, Docker, CI/CD, Canva, Netlify, REST APIs, Gemini API

Soft Skills: Agile Project Management, Cross-functional Collaboration, Analytical Thinking, Problem Solving

PROJECTS

Multi-Agent SOC (Security Operations Center) / *Tech Stack:* Python, Docker, CI/CD Mar 2026

- Engineered a three-agent automated SOC system to handle end-to-end security lifecycle—from real-time threat detection to active mitigation—reducing manual incident response overhead.
- Built an investigative pipeline correlating system logs with live threat intelligence feeds and behavioral heuristics to identify and classify security incidents.
- Implemented autonomous remediation modules including dynamic firewall rule updates and automated forensic report generation.

Social Connect – AI Content Moderation Platform / *Tech Stack:* React.js, Python, Gemini API Nov 2025

- Developed an AI-powered social media moderation system to detect, classify, and reframe toxic and abusive comments in real time.
- Built a responsive frontend featuring post, like, and comment interactions with clean, accessible UI components.

AgriCon – AI & Blockchain PWA for Farmers / *Tech Stack:* React.js, TypeScript, Gemini API Mar 2025

- Designed and implemented accessible UI/UX for a Progressive Web App, simplifying AI-driven agricultural insights and blockchain transaction flows for low-tech users.
- Improved information hierarchy and navigation structure, reducing cognitive load and streamlining user journeys across core app features.

Synaptic Fitness – AI Fitness Application / *Tech Stack:* Figma Nov 2024

- Designed intuitive user flows and responsive interfaces for an AI-based fitness app, incorporating smooth animations for live workout monitoring and real-time feedback.
- Created interactive prototypes in Figma and translated designs into production-ready frontend components with personalized planning features.

EDUCATION

Atria Institute of Technology, Bengaluru

Sep 2023 – May 2027

Bachelor of Engineering in Computer Science and Engineering

Relevant Coursework: Data Structures & Algorithms, OOP, Database Management Systems, UI/UX Design, Web Technologies, Software Engineering & Project Management

LEADERSHIP & EXTRACURRICULARS

- Developer Relations & Operations Lead, AWS Student Builder Group – Managed developer community initiatives and technical outreach programs.
- Student Coordinator, ISTE Student Chapter – Organized 'Engineer's Eye', a multi-round technical event encompassing syntax challenges, algorithmic problem-solving, and interactive quizzes, overseeing full logistics and resource planning.
- Club Service Director, Rotaract Club of Atria I.T. – Led end-to-end planning and execution of community service events and key organizational activities.
