PROFESSIONAL SUMMARY

Computer Science undergraduate (2027) with a strong interest in Software Engineering, AI/ML, AWS Cloud, Automation, and Full-Stack Development. Proficient in React.js, Python, JavaScript, HTML/CSS, and Git, with hands-on experience building web applications and academic projects. Strong problem-solving, collaboration, and communication skills with a passion for creating scalable, user-centric solutions. Eager to contribute to innovative engineering teams while expanding expertise in AI/ML, cloud technologies, automation, and software development.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, TypeScript, Responsive Design, Progressive Web Apps (PWA)

Programming Languages: Python, Java, C

UI/UX Design: Figma, Wireframing, Prototyping, User Research, Usability Testing, Interaction Design, Information Architecture

Tools & DevOps: Git, GitHub, Docker, CI/CD, Canva, Netlify, REST APIs, Gemini API

Soft Skills: Agile Project Management, Cross-functional Collaboration, Analytical Thinking, Problem Solving

EXPERIENCE

Infosys Springboard Virtual Internship 7.0 – Artificial Intelligence

Jun 2026 – Present

PROJECTS

Multi-Agent SOC (Security Operations Center) | *Tech Stack:* Python, Docker, CI/CD, Nvidia NIM

Mar 2026 – Present

- Engineered a three-agent automated SOC system to handle end-to-end security lifecycle—from real-time threat detection to active mitigation—reducing manual incident response overhead.
- Built an investigative pipeline correlating system logs with live threat intelligence feeds and behavioral heuristics to identify and classify security incidents.
- Implemented autonomous remediation modules including dynamic firewall rule updates and automated forensic report generation.

Social Connect – AI Content Moderation Platform | *Tech Stack:* React.js, Flask, SQLite, REST APIs, Gemini API

Nov 2025

- Developed a full-stack social media platform using React.js and Flask, featuring user authentication, posts, image uploads, likes, and comments.
- Built and integrated RESTful APIs with SQLite for backend functionality and data management.
- Integrated the Gemini API to enable AI-powered comment moderation with real-time toxicity analysis.

AgriCon – AI & Blockchain PWA for Farmers | *Tech Stack:* React.js, TypeScript, Gemini API

Mar 2025

- Designed and implemented accessible UI/UX for a Progressive Web App, simplifying AI-driven agricultural insights and blockchain transaction flows for low-tech users.
- Improved information hierarchy and navigation structure, reducing cognitive load and streamlining user journeys across core app features.

CERTIFICATIONS

AWS Certified AI Practitioner – Udacity

June 2026

EDUCATION

Atria Institute of Technology, Bengaluru

Sep 2023 – May 2027

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.79

Relevant Coursework: Data Structures & Algorithms, OOP, Database Management Systems, UI/UX Design, Web Technologies, Software Engineering & Project Management

LEADERSHIP & EXTRACURRICULARS

- Developer Relations & Operations Lead, AWS Student Builder Group – Managed developer community initiatives and technical outreach programs.
- Student Coordinator, ISTE Student Chapter – Organized 'Engineer's Eye', a multi-round technical event encompassing syntax challenges, algorithmic problem-solving, and interactive quizzes, overseeing full logistics and resource planning.
- Club Service Director, Rotaract Club of Atria I.T. – Led end-to-end planning and execution of community service events and key organizational activities.
